Leading or presiding officer of an organized group "Chairman of the Board" redirects here. For other uses, see Chairman of the Board (disambiguation). Agustín Vásquez Gómez, ambassador of the Republic of El Salvador, chairman of the Board (disambiguation).
presiding officer of an organized group such as a board, committee, or deliberative assembly. The person holding the group, and is required to conduct the group is business in an orderly fashion.[1] In some organizations, the chair is also
 known as president (or other title).[2][3] In others, where a board appoints a president (or other title), the two terms are used for distinct positions. The term chairman may be used in a neutral manner, not directly implying the gender of the holder. In meetings or conferences, to "chair" something (chairing) means to lead the event.[4] Look up chair,

refer to a seat or office of authority since the middle of the 17th century; its earliest citation in the Oxford English Dictionary dates to 1658-1659, four years after the first citation for chairman as a possible example of sexist language, associating the male gender with the exercise of authority, this
has led to some use of the generic "Chairperson".[15] In World Schools Style debating, as of 2009, chair or chairman to address the chair.[16] The FranklinCovey Style Guide for Business and Technical Communication and the American Psychological
Association style guide advocate using chair or chairperson.[17][18] The Daily Telegraph's style guide bans the use of chair and chairperson; the newspaper's position, as of 2018, is
that "chairman is correct English".[20] The National Association of Parliamentarians adopted a resolution in 1975 discouraging the use of chairperson and rescinded it in 2017.[21][22] Ambassador Leena Al-Hadid of Jordan chairs a meeting of the International Atomic Energy Agency, 2018.[23] The word chair can refer to the place from which the holder
of the office presides, whether on a chair, at a lectern, or elsewhere.[1] During meetings, the person presiding is said to be "in the chair" and is also referred to as "the 
intended to maintain the presiding officer's impartiality and to ensure an objective and impersonal approach.[7][24] In the British music hall tradition, the chairman was the master of ceremonies who announced the performances and was responsible for controlling any rowdy elements in the audience. The role was popularised on British TV in the 1960s
and 1970s by Leonard Sachs, the chairman on the variety show The Good Old Days.[25] "Chairman" as a quasi-title gained particular resonance when socialist states from 1917 onwards shunned more traditional leadership labels and stressed the collective control of Soviets (councils or committees) by beginning to refer to executive figure heads as
 "Chairman of the X Committee". Lenin, for example, officially functioned as the head of Soviet Russian government not as prime minister or as president, but as "Chairman of the Council of People's Committee" (until 1938) and then
 "Chairman of the Presidium of the Presidium of the Presidium of the Supreme Soviet". In Communist China, Mao Zedong was commonly called "Chairman of the Central Military Commission. Sam Ervin (right), chairman of the United States Senate Watergate Committee, 1973 In addition
to the administrative or executive duties in organizations, the chair presides over meetings include: Calling the meeting to order Determining if a quorum is present Announcing the rules of the group Putting
questions (motions) to a vote, which is the usual way of resolving disagreements following discussion of the issues Adjourning the meeting While presiding, the chair should remain impartial and not interrupt a speaker if the speaker has the floor and is following the rules of the group. [29] In committees or small boards, the chair votes along with the
other members; in assemblies or larger boards, the chair should vote only when it can affect the result.[30] At a meeting, the chair only has one vote (i.e. the chair such authority).[31] The powers of the chair vary widely across
organizations. In some organizations they have the authority to hire staff and make financial decisions. In others they only make recommendations to a board of directors, or may have no executive powers, in which case they are mainly a spokesperson for the organization. The power given depends upon the type of organization, its structure, and the rules
it has created for itself. If the chair exceeds their authority, engages in misconduct, or fails to perform their duties, they may face disciplinary procedures. Such procedures may include censure, suspension, or removal from office. The rules of the organization would provide details on who can perform these disciplinary procedures. [32] Usually, whoever
appointed or elected the chair has the power to discipline them. There are three common types of chair in public corporations. The chief executive officer (CEO) may also hold the title of chair, in which case the board frequently names an independent member of the board frequently names an independent director. [33] This position is equivalent to the position of
président-directeur général in France.[citation needed] Executive chair is an office separate from that of CEO, where the titleholder wields influence over company operations, such as Larry Ellison of Oracle, Douglas Flint of HSBC and Steve Case of AOL Time Warner. In particular, the group chair of HSBC is considered the top position of that institution,
outranking the chief executive, and is responsible for leading the board and representing the company in meetings with government figures. Before the creation of the group management board in 2006, HSBC's chair essentially held the duties of a chief executive at an equivalent institution, while HSBC's chair essentially held the duties of a chief executive at an equivalent institution, while HSBC's chair essentially held the duties of a chief executive at an equivalent institution, while HSBC's chair essentially held the duties of a chief executive at an equivalent institution, while HSBC's chair essentially held the duties of a chief executive at an equivalent institution, while HSBC's chair essentially held the duties of a chief executive at an equivalent institution, while HSBC's chair essentially held the duties of a chief executive at an equivalent institution at a chief executive at a chi

the world, many companies have separated the roles of chair and CEO, saying that this move improves corporate governance. The non-executive chair's duties are typically limited to matters directly related to the board, such as by setting its annual
 agenda. Reviewing and evaluating the performance of the CEO and the other board members. Christina Magnuson, as chairman, [38] presides over the 2016 annual meeting of the Friends of the Ulriksdal Palace Theater. Many companies in the US have an executive chair; this method of organization is sometimes called the American model. Having a non-
executive chair is common in the UK and Canada; this is sometimes called the British model. Expert opinion is rather evenly divided over which is the preferable model. [39] There is a growing push by public market investors for companies with an executive chair to have a lead independent director to provide some element of an independent perspective.
[40][41] The role of the chair in a private equity-backed board differs from the role in non-profit or publicly listed organizations in several ways, including the pay, role and what makes an effective private-equity chair.[42] Companies with both an executive chair and a CEO include Ford,[43] HSBC,[44] Alphabet Inc.,[45] and HP.[46] A vice- or deputy
 chair, subordinate to the chair, is sometimes chosen to assist and to serve as chair in the latter's absence, or when a motion involving the chair groups sometimes elect a chair pro tempore to fill the role for a single meeting. [48] In some organizations that have both titles, deputy chairness elect a chair pro tempore to fill the role for a single meeting.

undoubtedly create huge demand from passengers seeking convenient and affordable flights. What people are saying about their flights 2025-06-07 From Tokyo - New Tokyo International Airport (NRT) To Manila - Ninoy Aquino Intl (MNL)Although not a true lie-flat seat, this is a comfortable seat with ample legroom. Food and service on this flight is top
notch and there is ample storage and ports for accessories. The ANA lounge in Narita is right around the corner from the boarding gate, but was very busy and crowded when I visited. (NRT)Comfortable and spacious seat with minor legroom space issue with seat in the lie-flat position. Service by an fully Asian female crew was excellent and first class. Dinner (baby back pork ribs) was one of the best meals I've ever had on a flight. Although this is a window seat, looking out the window is a little difficult due to the angle position of the
seat. I didn't care for the padded seat belt which... More reviews for Air Canada Boeing B787-9 (789) International (YVR)This flight was the inaugural AC flight from Tampa to Vancouver . 3A was a good seat with plenty of legroom. Only problem I had was getting out
enroute with the passenger in 2A fully reclined (the whole flight by the way) and the low overhead bins. Being 6' 1" was a real challenge even with nobody next to me in the aisle seat. Simple Flying takes a look at the unstoppable growth of Ethiopian Airlines. Humble Beginnings As previously mentioned, Ethiopia to France, the UK, and the US. Eventually, TWA picked up the offer founding the airline with a $25m ETB investment from the
government. While the airline was operated by TWA, it was solely owned by the Ethiopian's first revenue service operated using a Douglas C-47 acquired from the US government. It flew from Addis Ababa to Asmara to Cairo. The flight was first
operated on the 8th April in 1946. By 1949 Ethiopian Airlines was recording profits of £40,000 or around £1,343,750.00 in today's money. Now, fast forward a fair few years, and Ethiopian Airlines receives their first B787 in 2012. Ethiopian became a member of the Star Alliance in 2011 following an invitation from Lufthansa. Ethiopian Airlines either runs or is looking to run, a part of airlines in 6 different African aviation market. [ege cards related id="38"] Still Launching New Routes Ethiopian Airlines has no plans to slow their growth. The airline is still launching new routes. In fact, on Monday
 Ethiopian launched the first route that travels non-stop between Los Angeles and Africa. The airline had been flying to Los Angeles via a stop required for technical reasons in Dublin, however, this stop has now moved to Lomé in Togo. Ethiopian's new route between Los Angeles and Addis Ababa. Image: GCMaps Lomé is where ASKY Airlines is based,
and ASKY is an airline in which Ethiopian owns a 40% share. This all put together means passengers bound for all corners of Africa from Los Angeles and Lomé on Mondays, Wednesdays, and Saturdays. In addition to the new African route, Ethiopian has also
launched a couple of new routes into Europe. A new flight has launched from Addis Ababa to Moscow. This service will operate directly between the cities using a B787-8, and launched on 17th of December was a new route to Manchester. This route, also operated by a B787-8 is an extension of the Addissaction and the cities using a B787-8.
 Ababa to Brussels route. However, According to anna.aero Ethiopian do not have the rights to carry passengers between Brussels and Manchester. How big do you think Ethiopian will grow? 1920 - 5 February 2010) was an English actor who had a career that spanned seventy years. Born in Kingston upon Hull, he trained at the Royal Academy of Dramatic Art, but his studies—and the early stages of his career—were curtailed by the Second World War. After initial success in revue and sketch productions, he was cast by the film producers
John and Roy Boulting to star in a series of satires, starting with Private's Progress in 1956 through to I'm All Right Jack in 1959. In the mid-1960s he played Bertie Wooster for BBC Television for which he received positive reviews, including from P. G. Wodehouse, the writer who created the character of Wooster. In the early 1970s he played another
upper-class literary character, Lord Peter Wimsey, the amateur but talented investigator created by Dorothy L. Sayers. Carmichael was often typecast as an affable but bumbling upper-class innocent, but he retained a disciplined approach to training and rehearsing. (Full article...) Built in the
Ionic order, it is the best-known structure and symbol of pre-Christian Armenia. It has been described as the "easternmost building in the former Soviet Union. It is conventionally identified as a pagan temple built by King Tiridates I in the first century AD as a temple to the
sun god Mihr (Mithra). It collapsed in a 1679 earthquake, but much of its fragments remained on the site. Renewed interest in the 19th century led to excavations in the early and mid-20th century. It was reconstructed in 1969-75, using the anastylosis technique. It is one of the main tourist attractions in Armenia and the central shrine of Hetanism

Development of the Watt steam engine in the late 18th century was an important element in the Industrial Revolution in Europe
The American Revolutionary War took place in the late 18th century, elements of Enlightenment thinking culminated in the Atlantic Revolutions. Revolutions began to challenge the legitimacy of
monarchical and aristocratic power structures. The Industrial Revolution began mid-century, leading to radical changes in human society and the environment. The European colonization of the Americas and other parts of the world intensified and associated mass migrations of people grew in size as part of the Age of Sail. During the century, slave
start of the French Revolution, with an emphasis on directly interconnected events.[3][4] To historians who expand the century to include larger historical movements, the "long" 18th century[5] may run from the Glorious Revolution of 1688 to the Battle of Waterloo in 1815[6] or even later.[7] France was the sole world superpower from 1659, after it
defeated Spain, until 1815, when it was defeated by Britain and its coalitions following the Napoleonic Wars. In Europe, philosophers ushered in the Age of Enlightenment. This period coincided with the French Revolution of 1789, and was later compromised by the excesses of the Reign of Terror. At first, many monarchies of Europe embraced
Enlightenment ideals, but in the War of the French Revolution and the Seven Years' War, saw Great Britain triumph over its rivals to become the
preeminent power in Europe. However, Britain's attempts to exert its authority over the Thirteen Colonies became a catalyst for the American Revolution. The 18th century also marked the end of the Polish-Lithuanian Commonwealth as an independent state. Its semi-democratic government system was not robust enough to prevent partition by the
consequently lagged behind and suffered several defeats against Russia in the second half of the century. In South Asia, the death of Mughal emperor Aurangzeb was followed by the expansion of the Maratha Confederacy and an increasing level of European influence and control in the region. In 1739, Persian emperor Nader Shah invaded and plundered
Delhi, the capital of the Mughal Empire. Later, his general Ahmad Shah Durrani scored another victory against the Marathas, the then dominant power in India, [9][8] and by the end of the century, the Anglo-Mysore Wars
against Tipu Sultan and his father Hyder Ali, led to Company rule over the south.[10][11] In East Asia, the century was marked by the High Qing era, a period characterized by significant cultural and territorial expansion. This period also experienced relative peace and prosperity, allowing for societal growth, increasing literacy rates, flourishing trade,
and consolidating imperial power across the vast Qing dynasty's territories. Conversely, the continual seclusion policy of the Tokugawa and experienced a flourishment of the arts as well as scientific knowledge and advancements, which were introduced to Japan through the Dutch port of
Nagasaki. In Southeast Asia, the Konbaung-Ayutthaya Wars and the Tây Son Wars broke out while the Dutch East India Company established increasing levels of control over the Mataram Sultanate. In Africa, the Ethiopian Empire underwent the Zemene Mesafint, a period when the country was ruled by a class of regional noblemen and the emperor was
merely a figurehead. The Atlantic slave trade also saw the continued involvement of states such as the Oyo Empire. In Oceania, the European colonization of Australia and New Zealand began during the late half of the century. In the Americas, the United States declared its independence from Great Britain. In 1776, Thomas Jefferson wrote the
Declaration of Independence. In 1789, George Washington was inaugurated as the first president. Benjamin Franklin traveled to Europe where he was hailed as an inventor. Examples of his inventions include the lightning rod and bifocal guide

company or organization responsible for finances "CFO" redirects here. For other uses, see CFO (disambiguation). A chief financial officer (CFO) is an officer of a company or organization who is assigned the primary responsibility for making decisions for the company for projects and its finances; i.a.: financial planning, management of financial risks
record-keeping, and financial reporting, and financial reporting, and, increasingly, the analysis of data. The CFO thus has ultimate authority over the finance unit and is the chief executive officer (CEO) and the board of directors and may additionally have a seat on the board. The CFO directly
assists the chief operating officer (COO) on all business matters relating to budget management, cost-benefit analysis, forecasting needs, and securing of new funding. Some CFOs have the title CFO, and FD is the level before
reaching CFO. The appointment of a CFO or FD may be mandated by law. For example, in India, per the provisions of Section 203 of Companies Act 2013 every publicly listed firm having a paid up share capital of Rs. 10 Crores, requires a full time CFO. In the government sector this may be specified also: The US Chief Financial Officers Act, enacted in
 1990, created a CFO in each of 23 federal agencies. (See also Office of Management and Budget and Office of Federal Financial Management.) The chief financial officer was traditionally viewed as a financial gatekeeper. Over time, the position has become one of an advisor and strategic partner to the CEO.[2][3] According to one source, "The CFO of
tomorrow should be a big-picture thinker, rather than detail-oriented, outspoken rather than unilateral decisions".[4] The duties of a modern CFO, therefore, now straddle the traditional areas of financial
stewardship, as well as the more progressive areas of strategic- and business leadership, with increasingly direct responsibility and oversight of operations.[5] This significant role-based transformation is best-evidenced by the "CEO-in-Waiting" status that many CFOs now hold. Here, CEOs increasingly expect their CFOs to be active participants in
shaping the strategy of their organizations, including challenging the current strategies.[8] Indeed, the 1990s saw the
rise of the strategic CFO, and many companies have created a chief strategy officer (CSO) position. [9] See also Strategic financial management. The CFO is then as much a part of governance and oversight as the CEO, playing a fundamental role in the development and critique of strategic choices. Relatedly The CFO is expected to be a key player in
 stockholder education[10] and communication and is clearly seen as a leader and team builder who sets the financial agenda for the organization, supports the CEO directly and provides timely advice to the board of directors."[11] The rise of digital technologies and focus on data analytics to support decision-making, places more pressure on CFOs to
meet the expectations of their C-Suite colleagues.[12] Here, many organization as a shared service an FP&A organization as a shared service and service as a shared service and service as a shared service as a shared service and service as a shared service and service as a shared servi
 finance business partnering organization based on leadership of divisions, regions and performance improvement expertise centers specializing in Tax, Treasury, Internal Audit, Investor Relations, etc. CFOs are increasingly being relied upon as the owners of business information, reporting and financial data within organizations - thereby also assisting in
decision support operations to enable the company to operate more effectively and efficiently. The CFO must then serve as the financial authority in the organization, [13] ensuring the integrity of data, and modeling transparency and accountability. CFOs have then become more focused on financial reporting, although (as of 2016) a majority still spend
much of their time in traditional accounting tasks such as transaction reporting. [14] Additionally, many CFO's have been encouraged to appoint a chief
procurement officer (CPO) where this post does not exist, ensure the post-holder is accountable for procurement success, and to become increasingly involved (directly via oversight or indirectly via
procurement function and the CPO.[15][16][17] Due to their importance, CFO departures—whether due to retirement, dismissal, or new opportunities—can significantly affect a company's direction and stability, especially given the CFO.[18] See also: Financial analyst § Qualification, and Outline of finance
 § Education CFOs and FDs often hold a professional accounting qualification - the CPA, CA, CMA, or CIMA - along with its requisite bachelors and/or masters in accounting. The certification is specified given that responsibilities extend to tax and financial reporting.[19] Similarly, financial managers are often qualified accountants.[citation needed] In
 large companies,[citation needed] CFOs and FDs may hold additional postgraduate qualifications,[20] such as a Master of Business Administration,[21] or Master of Science in Finance;[22] the Chartered Financial Analyst is also common.[20] These complement the accounting perspective with more general strategic, leadership and financial market
considerations, and give exposure to broader financial and operational issues.[20] Auditor general Comptroller Treasurer Virtual CFO Financial manager ^ "Job openings/CFOO - Wikimedia Foundation.org. Archived from the original on 12 June 2018. ^ "CFO Role Shifts From Number Cruncher To Business

It is one of the best foreign shipping companies in the world because of the size of its
fleet, the amount of cargo it can carry, and the new ways it builds ships. EGLV ContainerH is a privately owned freight handling company with its principal office at Munich Airport. It also has two other locations in Landshut and one more office in the UK. For more than 30 years, the company has been providing logistics services to industries like the car
and aviation industries, providing transport solutions around the world. Since 1993, EGLV ContainerH has been focusing on the logistics needs of the aerospace business, which includes transporting parts for airplanes. The company offers onboard courier services run by skilled, experienced, and local courier workers who ensure that shipping runs
smoothly. With access to many passenger flights and world help from operating airlines, the company can take the next flight and have goods delivered right to the factory door. EGLV ContainerH also provides door-to-door express, direct, and consolidation air freight, air charter, AOG, OBC, and storage services. They also offer professional packing
 services, document handling, and excess luggage service. Their service department is available 24 hours a day, seven days a week, to help with project cargo that requires smart and new solutions. Their operational team has extensive knowledge and is committed to helping with project cargo that requires smart and new solutions. goods and all logistical needs. They work closely with customs to reduce any risks that might come up during transport, and they can provide great help on the fastest and least expensive ways to get any kind of cargo to any seaport. Since its start in 1994, EGLV Courier has been offering professional and dependable courier services to businesses on the
 south side of Atlanta, Georgia. The company has grown since then and now serves all of metro Atlanta and North Georgia as a logistics and transportation business. Before 1998, Evergreen Line Trucking Company, Inc. only moved Less-Than-Truckload (LTL) freight in the metro Atlanta area. The company now considers the distribution goals and aims of
its customers in the Atlanta, Georgia, area to ensure that its services meet their needs. Airline Code: 071 Cargo TrackingIATA Airways Code: ET Similar Packages: Ethiopian Air Lines Inc. was setup at the beginning of 1946, as a joint venture with Trans World Airlines, an American airline. The initial fleet consisted of 5 US Government surplus C-47
Skytrain aircraft.On the 8th of April, 1946, the airline's first scheduled flight to Cairo took place. One year later, three additional Skytrains joined the fleet, fitted out in a "luxury" layout for international routes (21 forward facing seats, compared with the first five, ex-military aircraft without any comforts, only featuring folding bench-type canvas seats
 along the sides). By the end of 1952, 3 Convair 240 were added to the fleet. They were able to accommodate 36 passengers and had pressurized cabins, as well as fully furnished interiors. In 1957, flights to Frankfurt were added and the airline's own maintenance facility was establised at Addis Ababa. During the same year, the first Ethiopian commercial
 aircraft commander made his first solo flight as captain. In 1958, Ethiopian Air Lines added DC-6B Cloudmasters to the fleet, using them on the long-haul routes. Two years later, the airline prepared to enter the jet age and the construction of a new airport and headquarters at Bole started. In 1961, Ethiopian Air Lines linked Addis Ababa with Monrovia in
 Liberia, via Khartoum and Accra, this being the first direct air link between Eastern and Western Africa operated by any airline. At the end of 1962, the runway and control tower at Bole became operational, the first two Boeing 720Bs arriving on their delivery flights and making Ethiopian the first airline in Africa to order it. In early 1963, the airline's first
 jet service was inaugurated, connecting Bole to Nairobi, quickly followed by the second route using a Boeing 720B, from Bole to Madrid, via Asmara and Athens. Ethiopian Air Lines changed its name to Ethiopian Airlines in 1965, making the transition from corporation to share company at the same time. In 1971, Semret Medhane became the airline's first
 Ethiopian general manager. Six years later, a Boeing 720B flight simulator was purchased, allowing the airline to train its pilots without depending on foreign airlines. In 1979, the oldest Boeing 720s were replaced by two Boeing 727s. A third Boeing 727 and two de Havilland Canada DHC-5 Buffalo aircraft joined the fleet in 1982. In 1982, Ethiopian
Airlines' first Boeing 767 landed at Bole after a direct delivery flight from New York, setting a new world distance record for a twin-engined commercial jet. At the end of 1985, the 40 years old DC-3/Skytrains started to be withdrawn from the fleet, nine of them remaining in service until October, 1991. They were replaced by six 18-seater DHC-6 Twin
Otters, and two ATR-42 46-seater aircraft, for the busier domestic routes. The Cargo Management Department was born in 1989. In 1996, the airline celebrated its 50th anniversary by adding Fokker 50s to the fleet and the pilot training school received a simulator replicating the flight deck of the Boeing 767, also used to train Boeing 757 crews. Shortly after, New York followed. The ShebaMiles frequent flyer program was launched in February, 1999. In 2002, the airline entered a period of sustained growth and
modernization of its fleet, ordering six B737-200s and six 767-300ERs to replace the existing two B737-200s. The following year, Bole International Airport's 3,800 meter runway and control tower became operational, as well as the new airport terminal started being renovated to serve mainly the domestic to
flights.In 2005, Ethiopian Airlines announced its firm order for ten Boeing 787 Dreamliners, also being Africa's launch carrier for this aircraft type. One year later, the airline celebrated 60 years of activity and inaugurated a new maintenance hangar, as well as a cargo terminal. Ethiopian secured its IATA-IOSA registration certificate in 2007, thanks to its
 "fundamental commitment to provide safe and reliable air transport services for passengers and cargo". In 2008, Ethiopian ordered no less than 35 aircraft, directly from the manufacturers. In late September, 2010, Ethiopian Airlines was

executive officer (CEO),[1] also known as a chief executive or managing director, is the top-ranking corporate officer charged with the management of an organization, usually a company or a nonprofit organization, usually a company or a nonprofit organization.
organizations (notably state-owned enterprises). The governor and CEO of a corporation or company typically reports to the board of directors and is charged with maximizing the value of the business,[1] which may include maximizing the profitability, market share, revenue, or another financial metric. In the nonprofit and government sector, CEOs
typically aim at achieving outcomes related to the organization, usually provided by legislation. CEOs are also frequently assigned the role of the main manager of the organization and the highest-ranking officer in the C-suite. [2] The term "chief executive officer" is attested as early as 1782, when an ordinance of the Congress of the
Confederation of the United States of America used the term to refer to governors and other leaders of the executive branches of each of the Thirteen Colonies.[3] In draft additions to the Oxford English Dictionary published online in 2011, the Dictionary says that the use of "CEO" as an acronym for a chief executive officer originated in Australia, with
the first attestation being in 1914. The first American usage cited is from 1972.[4] The responsibilities of an organization's structure. They can be far-reaching or quite limited, and are typically enshrined in a formal delegation of authority regarding
business administration. Typically, responsibilities include being an active decision-maker on business strategy and other key policy issues, as well as leader, manager, and executor roles. The communicator role can involve speaking to the press and the public, as well as to the organization's management and employees. The decision-making role entails
making high-level decisions regarding policy and strategy. The CEO is responsible for implementing the goals, targets, and strategic objectives as determined by the board of directors, motivates employees, and drives change within the
organization. As a manager, the CEO presides over the organization's day-to-day operations, including those in operations, marketing, business development, finance, human resources, etc. The CEO of a political party is often entrusted with fundraising,
particularly for election campaigns. The use of the CEO title may be used by for-profit companies or non-profit or charitable organisations, such as the Wikimedia Foundation. In some countries, there is a dual board system with two separate boards, one executive board for the day-to-day business and one supervisory board for control purposes (selected
by the shareholders). In these countries, the CEO presides over the executive board and the chairperson presides over the supervisory board, and these two roles will always be held by different people. This ensures a distinction between management by the executive board and governance by the supervisory board. This allows for clear lines of authority
The aim is to prevent a conflict of interest and too much power being concentrated in the hands of one person. In the United States, the board of directors (elected by the shareholders) is often equivalent to the supervisory board, while the executive board may often be known as the executive committee (the division/subsidiary heads and C-level officers
that report directly to the CEO). In the United States, and in business, the executive officers of a corporation, the chief executive officers not also
sitting on the board of directors. In the case of a sole proprietorship, an executive officer is a managing partner, or administrative partner, or administrative partner, senior partner, sen
Depending on the organization, a CEO may have several subordinate executives to help run the day-to-day administration of the company, each of whom has specific functional responsibilities referred to as senior executives, [8] executive officers. Subordinate executives are given different titles in different organizations, but one
common category of subordinate executive, if the CEO is also the president, is the vice president, each tasked with a different area of responsibility (e.g., VP of finance, VP). An organization may have more than one vice president, each tasked with a different area of responsibility (e.g., VP of finance, VP).

it can also be seen as "simply another way to add emphasis to the role of a modern-day CEO - where they are both the external face of, and the driving force behind, an organization culture".[9] Brad D. Smith, former CEO of Intuit In the US, the term "chief executive officer" is used primarily in business, whereas the term "executive director" is used
primarily in the not-for-profit sector. [10] These terms are generally mutually exclusive and refer to distinct legal duties and responsibilities. [11] The CEO is the highest-ranking executive in a company, making corporate decisions, managing operations, allocating resources, and serving as the main point of communication between the board of directors
and the company.[12] In the UK, chief executive and chief executive officer are used in local government, where their position in law is described as the "head of paid service",[13] and in business and in the charitable sector.[14] As of 2013[update], the use of the term director for senior charity staff is deprecated to avoid confusion with the legal duties
and responsibilities associated with being a charity director or trustee, which are normally non-executive (unpaid) roles. The term managing director is often used in lieu of chief executive officer. Business publicists since the days of Edward Bernays (1891–1995) and his client John D. Rockefeller (1839–1937) and even more successfully the corporate
publicists for Henry Ford, promoted the concept of the "celebrity CEO". Business journalists have often adopted this approach, which assumes that the corporate achievements, especially the "heroic CEO". In effect, journalists celebrate a CEO who takes distinctive
strategic actions. The model is the celebrity in entertainment, sports, and politics - compare the "great man theory". Guthey et al. argues that "...these individuals are not self-made, but rather are created by a process of widespread media exposure to the point that their actions, personalities, and even private lives function symbolically to represent
significant dynamics and tensions prevalent in the contemporary business atmosphere".[15] Journalism thereby exaggerates the importance of the CEO and tends to neglect harder-to-describe broader corporate factors. There is little attention to the intricately organized technical bureaucracy that actually does the work. Hubris sets in when the CEO
internalizes the celebrity and becomes excessively self-confident in making complex decisions. There may be an emphasis on the sort of decisions that attract the celebrity journalists. [16] Research published in 2009 by Ulrike Malmendier and Geoffrey Tate indicates that "firms with award-winning CEOs subsequently underperform, in terms both of stock
and of operating performance".[17] Main article: Executive compensation § Controversy Executive compensation has been a source of criticism following a dramatic rise in pay relative pay differs around the world,
and, in some smaller countries, is still around 20-to-1.[19] Observers differ as to whether the rise is due to competition for talent or due to lack of control by compensation committees.[20] In recent years, investors have demanded more say over executive pay.[21] Main article: Gender diversity § In the boardroom Lack of diversity amongst chief

behavior behind a facade of charm and eloquence. Traits such as courage and risk-taking, generally considered desirable, are often found alongside these psychopathic traits thrive in chaotic environments and are aware that
others do not. As a result, they may intentionally create chaos in the workplace. [30][31] This perspective is explored in the book Snakes in Suits, co-authored by Robert D. Hare. However, Scott Lilienfeld has argued that the attention given to psychopathy in the workplace by both the media and scholars has far exceeded the available scientific evidence.
Emilia Bunea, writing in Psychology Today, has linked psychopathic traits in managers to workplace bullying, employee dissatisfaction, and turnover intentions. Despite this, Bunea cautions that excessive worry about supposed psychopathic managers could discourage individuals from pursuing careers in corporations and deter employees from
addressing issues with difficult bosses.[32] CEO succession CEO of public schools City manager Executive officers Occupational Information Network Prime minister United States Department of Labor a b Lin, Tom C. W. (April 23, 2014). "CEOs and Presidents". UC
